

## EAT A BANANA, SLEEP WITH IT TOO!

A completely natural product made from the banana waste, the name BeLeaf stands for "Biological Engineered leaves". It is a sustainable, recyclable and an ecological product. It has received the Interzum award for Intelligent Material & Design.

By using the waste, Beleaf helps to decrease the CO2 emissions. Consumers have an option to positively help the environment by using Beleaf veneers.

Quite inspiring! We hope that even in India some bright minds start making similar nature friendly products!

Product- Banana Fibres Veneer  
Company- Beleaf S A M  
Application- Panels, Flooring etc  
Country- Monaco
